CONFIDENTIAL AI SECURITY REPORT

Executive Summary

SentinelAI performed an AI Prompt Security Assessment using multiple security detectors and MITRE ATLAS mapping.

Metric	Result
Overall Safety Score	89.1/100
Risk Level	Medium
Deployment	Approved
Overall Threat	Critical
Prompt Safety Score	0/100

Threat Analysis

Detector	Threat	Confidence
Prompt Injection	Critical	100%
Jailbreak	Critical	90%
Prompt Leakage	High	75%
Role Override	High	60%

MITRE ATLAS Intelligence

Technique ID	Technique	Description
AML.T0051	Prompt Injection	Attempts to manipulate an AI system using malicious prompts.
AML.T0015	Safety Bypass	Attempts to bypass AI safety mechanisms.
AML.T0048	Prompt Extraction	Attempts to reveal hidden prompts or system instructions.
AML.T0026	Identity Manipulation	Attempts to change the AI's assigned identity or role.

Attack Timeline

- {'stage': 'Prompt Received', 'threat': 'Safe'}
- {'stage': 'Prompt Injection Scan', 'threat': 'Critical'}
- {'stage': 'Jailbreak Scan', 'threat': 'Critical'}
- {'stage': 'Prompt Leakage Scan', 'threat': 'High'}
- {'stage': 'Role Override Scan', 'threat': 'High'}
- {'stage': 'Final Risk Assessment', 'threat': 'Critical'}

Overall Risk Assessment

Risk Level: Medium

Overall Threat: Critical

Security Recommendations

1. Validate every user prompt before sending it to an LLM.
2. Enable prompt injection detection before inference.
3. Protect hidden system prompts from disclosure.
4. Continuously monitor jailbreak attempts.
5. Apply human review for High and Critical threats.
6. Use MITRE ATLAS mapping during security audits.
7. Maintain prompt logs for forensic investigations.
8. Re-evaluate prompts before production deployment.

Final Security Verdict

■ APPROVED WITH MONITORING

Overall Safety Score: 89.1/100

Deployment Status: Approved

Risk Level: Medium

SentinelAI recommends following the security recommendations listed in this report before deploying AI applications into production.
